

Case Study 6

A leading provider of Global Energy Solutions was looking to consolidate UK payroll solutions to reduce processing costs, improve HR processes and ensure a high standard of customer service.

For this customer Transact HR found:

- A provider who could deliver an automated interface with their SAP HCM system,
- Provide service levels with above industry standard KPI's,
- Provide a common UK HMRC accredited payroll solution across their business.

Plus, the solution would provide the customer with a return on their initial investment by the end of year two.
